

CB Tech HTR500

Power, Durability & Security For Public Drinking Water

The CB Tech HTR500 Fountain Filter is a next-level solution to drinking water fountain filtration. Designed to connect to the majority of public drinking water fountains, the HTR500 offers broad-spectrum drinking water contaminant treatment with the power to reduce the presence of dangerous modern-day threats to drinking water safety.

The HTR500 is made of sturdy and durable stainless steel, and its weatherproof and tamperproof housing allows it to be used both indoors and outdoors. Powerful, multi-modal filtration leverages mechanical filtration, electrokinetic adsorption, and physiochemical adsorption to provide broad-spectrum contaminant reduction while maintaining a robust flow rate. With the ability to install and connect to wall-mounted water fountains, it is the perfect drinking water accessory for schools, parks, hospitals, gyms, community centers, and more.

Contaminant Reduction List

- Asbestos
- Arsenic V
- Atenolol
- Bacteria
- Bisphenol A
- Carbamazepine
- Chloramine
- Chlordane
- Chlorine
- Cyst (Giardia, Cryptosporidium, Entamoeba, Toxoplasma)
- DEET
- Estrone
- Ibuprofen
- Lead
- Linuron
- Meprobamate
- Mercury
- Metolachlor
- Microcystin
- MTBE
- Naproxen
- Nonyl phenol
- PCB
- PFOA/PFOS
- Phenytoin
- Radon
- TCEP
- TCPP
- Toxaphene
- Trimethoprim
- Turbidity
- Virus
- Volatile Organic Chemicals

Specifications

Model Name	HTR500
Housing Dimensions	15.75" h x 15.75" w x 8" d
Weight	35 lbs.
Box Composition	304 Stainless Steel
Filter Housing Composition	316 Stainless Steel
Rubber Items	Silicone
Tubing	LLDPE
Fittings	Acetal Copolymer
Filter Endcaps	Polypropylene
Inlet/Outlet	3/8" Tube
Filter Capacity	500 gallons
Filter Performance	>90% reduction of free chlorine and chloramine
Operating Pressure	30 psi min (2.1 kg/cm ²) – 100 psi (14.1 kg/cm ²)
Operating Temperature	32o F (0o C) – 100o F (38o C)
Flow Rate	1.0 gpm @60 psi

Manufactured By: CB Tech Contract Sales
